# COVID-19 JOINT TASK FORCE

## Special Personal Protection Equipment (PPE) Update

**30 April 2020**

The company began adding personal protection equipment (PPE) to aircraft on Monday, April 27. During an audit of 12 aircraft on Wednesday, April 29, four kits had been removed from the aircraft.

It's hard to have a "Clean BEFORE and AFTER" campaign without these kits. Disinfecting your work space is the new normal. Please take the time and follow the directions in the Flight Deck Cleaning guide located on your EFB.

We recommend storing your masks in a paper bag. You can use a mask as long as you like – stored in a paper bag between uses – then replace it with a new one when you feel the mask is no longer effective.

If you show up at an aircraft that does not contain the kit, please ASAP the event. When transitioning through Chicago or Houston, you can replace or restock the kit at the Chief Pilot's office.

This is a new process for all of us. There was bound to be a speed bump or two along the road. Please work together and give us the best chance to work out this new procedure, identify any new threats and ASAP them.
